

WHAT WE DO

globaledit turns your browser into a secure cloud-based collaborative workspace for enterprise-class creative production.

WHY YOU BENEFIT

Move from the shoot to the cloud.

Keep your project moving from anywhere, on any device.

Focus on the creative.

» **Get your life back.** Upload, store and search thousands of high res photos and full HD videos in no time.

» **Keep going.** Review, comment, rate and markup your photos and videos on the go, with the swipe of a finger on your iPhone and iPad.

» **Stay in control.** Decide who receives your digital assets and what permissions they have. Your content is secure.

» **Tackle your projects.** Share your photos and videos with your team wherever they are, and keep everyone on track from shoot to distribution.

YOUR CREATIVE COLLABORATION TOOLS

MARKUP

Zoom in on photos or videos to make detailed markups and give direction with a variety of useful tools. Markups can be private or shared with your team.

APPROVAL GALLERIES

globaledit's talent approval system is the industry standard used by top media and entertainment companies. Easily approve assets on any device and remove bottlenecks to accelerate your production schedule.

CONTACT SHEETS

Easily generate custom contact sheets in seconds. Customize with titles, headers, footers and globaledit ratings.

RATINGS

globaledit provides many options to rate your content. We support star ratings, color labels, flags, approve, alt, select or kill ratings. Filter your content to find what you want, fast.

LIGHTBOXES

Lightboxes are collections of content that you create. Use them to share and distribute content internally or externally without affecting the original library. Manage how and when your collections are shared.

VIEW MODES

One up, two up compare, full screen, grid and detail views give you the industry's best review interface.
